DESCRIPTION:

The objective of this course is to create a solid foundation in the study of the theories and methods in historical ecology today. This will be accomplished by evaluating the new trends that have driven historical ecology in the last ten years. This new approach demands an interdisciplinary view. The first part of the class will focus on the different epistemological approaches. We will look at the kinds of questions asked and the methodologies employed to answer them. The last part of the course will place emphasis on case studies where historical ecology has been employed to understand long-term regional dynamics of the relationship between humans and the environment. We will examine the theoretical and methodological relationship of historical ecology to biology, geography, and geology as well as to history. We will look at why historical ecology is a powerful approach to evaluating critical theories that range from biology to history. We will look at how the theories are evaluated and what factors favor their success or abandonment.

REQUIRED READINGS:

Books

Kawa, Nicholas c. 2016. Amazonia in the Anthropocene . Texas university press.

Carol L. Crumley, T. Lennartsson and A. Westin. 2017 Issues and concepts in Historical Ecology. Cambridge University Press.

Chapters from edited books:

Rick, Rorben and Jon M. Erlandson (ed.) 2008. *Human Impacts on Ancient Marine Ecosystems: A Global Perspective*. University of California Press, Berkeley and Los Angeles.

Dean, Rebecca M. (ed.) 2010. *The Archaeology of Anthropogenic Environments*. No. 37. Center For Archaeological Investigations, Southern Illinois University, Carbondale.

Fairhead, James and Melisa Leach. 1996. *Misreading the African Landscape: Society and Ecology in a Forest-Savanna Mosaic*. Cambridge University Press.

Cooper, Jago and Payson Sheets (editors). 2012. *Surviving Sudden Environmental Change*. University of Colorado Press.

Håkansson, N Thomas and Mats Widgren (Editors). 2014. *Landesque Capital: The Historical Ecology of Enduring Landscape Modifications (New Frontiers in Historical Ecology)*. Left Coast Press.

Moore, Jason W. 2016. *Anthropocene or Capitocene?* PM Pres .

There will be other assigned readings. Most of these can be downloaded as PDF files from the library service. Sometimes you will have to copy them from the library journals at the main library.

EVALUATION:

Evaluation will be based on the accumulation of points up to 100 (100 points =100 %).

Short paper (20 %), presentation of paper (10%), two exams, each one (20%) and class participation (30 %).

The paper should be 5 to 8 pages in length, double-spaced including bibliography. For the paper you should choose a region of the planet where you can study the impact of human activity on the environment as well as the impact of the environment on the population. The paper should follow the format guidelines of the journal *American Anthropologist*.

There is a large amount of literature to be covered in this class and each student must be able to discuss each of the articles. You are responsible for all of the readings. It always helps to write a review on each article or chapter that you read, and have notes on the topics that are relevant for the discussion, as well as questions on the aspects that you do not understand.

Disclaimer: Some adjustments may be made in the schedule and course requirements during the semester. All changes will be announced.

ATTENDANCE is required.

GRADE SYSTEM:

Grading Scale Grades will be awarded according to the following scale in effect by the university:

A	A-	B+	B	B-	C+	C	C-	D+	D	D-	E
4.0	3.67	3.33	3.0	2.67	2.33	2.0	1.67	1.33	1.0	.67	0

A complete listing of university policy pertaining to grades may be found at <http://graduateschool.ufl.edu/files/handbook.pdf>
