COURSE DESCRIPTION

What is Regional Development?
What drives Regional Development?
Under which conditions do regions develop?

Development is a broad dynamic domain that reflects and contributes to the conditions of the contemporary world. It is a field of inquiry and an academic discipline with its own traditions, objectives and approaches to the changing world. This course aims to engender a critical geographical perspective on the past, present and future development of regions and the world. This critical viewpoint is of crucial importance in the generation of a broad and informed understanding of global and regional issues.

This course aims to build critical thinking when analysing the relationship between economics, politics, environmental and social processes and how it affects development in a regional scale. This will be done as an attempt to disrupt the hegemonic and colonial narratives on development by examining how Western knowledge systems contributed to separations of the world as we know it.

The course delves in understanding the history of development theory and main concepts, its roots and implications as well as the way these concepts have been shaped and applied by different regions. We will look at actors and actions to understand the role of development in promoting or contributing to local and global changes. We will do so by asking challenging questions focusing on social, economic, political, cultural and human-environment processes and how they change over space and time due to different notions of and approaches to development. The course will invite students into several subfields of study and aim to honour the diversity inherent in humanity.

COURSE CONTENT: GEO 4554 provides 3 credit hours of S-Social Sciences General Education Requirement (GER) and 6,000 words of Gordon Rule Communication requirement.

At the end of each part of the course, students must submit a content review through paper written in clear, professional style. Papers must be typed, double-spaced, 12-point (times new roman font), 1-inch margins top/bottom/right/left. Papers must start with student’s name and UFID and title and end with word-count. The paper may include figures, tables, maps, pictures, references, etc. in the appendix session and must have a minimum of 500 words. Module Review must be submitted via CANVAS.

- Final Project – 15%
Each student should present their acquired knowledge by submitting a final project. Students must find their own ways to express themselves and present the content. This can include poetry, Power Point presentation, videos, voice record, drawings, design a mind map, make a collage, photo album, etc. Final project must be presented in a clear, professional and creative style.
